Education

Indian Institute of Information Technology Kottayam

2023 – 2027

B.Tech in Computer Science and Engineering

Relevant Coursework

- Data Structures
- DBMS
- Machine Learning
- Computer Networks
- Algorithms
- Operating Systems
- Artificial Intelligence
- Software Engineering
- OOP
- Computer Organization
- Data Analytics

Experience

Infoz IT Solutions

Novemeber 2025 – Jan 2026

Data Science Intern

- Worked on data preprocessing, cleaning, and analysis using Python, Pandas, and NumPy.
- Assisted in developing machine learning models for predictive analytics and classification tasks.
- Performed exploratory data analysis (EDA) to identify trends and generate actionable insights.
- Created visualizations and reports to support data-driven decision making.

Projects

Parking Management System — MERN Stack

🐙 GitHub

- Developed a full-stack parking slot booking platform using React.js, Node.js, Express.js, and MongoDB.
- Designed RESTful APIs for slot booking, user management, and vendor operations.
- Implemented JWT-based authentication and role-based access control for secure user and vendor access.
- Integrated Stripe payment gateway for secure online parking reservations.

InsightForge AI – Multi-Agent Hybrid RAG Research Assistant

🐙 GitHub

- Designed and developed a multi-agent AI research assistant using LangGraph with Planner, Router, Research, Document Search, Fact Checker, and Writer agents.
- Built a Hybrid RAG pipeline integrating ChromaDB, HuggingFace Embeddings, Tavily web search, and Groq-hosted Llama 3.3 models.
- Implemented intelligent query routing to dynamically select document retrieval, web search, or hybrid workflows based on user queries.
- Developed a Streamlit application supporting PDF uploads, conversational AI, source citations, and downloadable research reports.

Customer Feedback Sentiment Analysis — NLP, Python

🐙 GitHub

- Built NLP-based sentiment analysis system using Python and TF-IDF
- Performed preprocessing, feature extraction, and sentiment classification
- Deployed Streamlit application for real-time sentiment prediction

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, ChromaDB (Vector Database)

AI/ML: Machine Learning, Deep Learning, NLP, LangChain, RAG

Tools: Git, GitHub, VS Code, Linux, Postman

Achievements

- Solved 250+ DSA problems across LeetCode, CodeChef and Codeforces.
- Built and deployed AI-powered and full-stack web applications.

Certifications

LLM Engineering and AI Agents – Udemy

Certificate

Data Science Internship – Infoz IT Solutions

Certificate

AICTE Virtual Internship – AI & Data Analytics

Certificate

Oasis Infobyte Web development Internship

Certificate
